

ELEVATE Tightly Aligns Suppliers with Customer Resource Requirements, Maximizing Productivity for Contingent Workforce Management Programs

STAKEHOLDER COLLABORATION

The innovative VMS platform from ELEVATE, enables tight collaboration between all stakeholders involved in contingent workforce management, driving process efficiencies, improving resource quality and enhancing communication between all parties involved.

In this vein, we believe the key to an effective program is setting staffing agencies up for success by providing the tools and services that are integral to their daily operations.

ELEVATE representatives spoke with several of our long-time supplier partners about how the platform differs from other VMS solutions in enabling their business practices. We obtained viewpoints on staffing supplier interactions throughout the process, from requirements visibility to billing and payments.

The dashboard where requirements, submissions and engagements are visible throughout the workflow and individual work items are accessible with one click. Engagements expiring within a certain time frame are all highlighted as well.

Another staffing partner, Paula Davy, Business Development Manager with AgreeYa also commented on the platform's simplicity, saying, "You can tell that someone who has been in the staffing business developed this tool. They have thought of everything you may want or need. The system is very easy to use and it helps drive our business rather than just being another administrative layer in the process."

EASE OF USE

The ELEVATE platform is designed to be intuitive and easy to use, so staffing agencies can spend more time sourcing talent, and less time navigating through the application and its data.

Lori Margentina, Sr. Managing Director at Ascent Services Group spoke very highly of the ELEVATE platform. She noted, "This is the best tool I have ever used. I have been in the staffing industry for over 30 years and have experience with nearly every tool out there. ELEVATE has everything you need on the dashboard. It's super simple and brings you all of the important information, while organizing your workflow. You don't feel like you are doing administrative duties – you have control and it keeps you engaged and drives the business more effectively. ELEVATE is just so well done – beautiful!"

ELEVATE

PLATFORM INTELLIGENCE

The value of any VMS tool is providing actionable intelligence to its users so they can make real-time business decisions. Ms. Davy further commented, saying, "The most important part of this platform is the ability to see what other vendors are doing on a requisition. Candidate submission visibility is key in helping us run our business, and it helps to motivate the team and prioritize our work. We don't see that with other platforms, and we even asked another large VMS vendor for this capability and they said it could not be done. The messaging capabilities are also something that no one else has. It's great to have all the conversations about a req captured in one place!"

Req #	Job Title	Requirement Status	Requirement Lifecycle	Client

The ELEVATE platform's open bidding feature provides full visibility into candidate rates and status on a requirement.

TIMELY UPLOAD AND PROCESSING

Efficient time entry for resources is paramount for suppliers supporting a large number of engagements for any one client. ELEVATE has an extremely efficient time upload process and takes the pain out of error resolution. With ELEVATE's time validation and reconciliation engine, missing time and other errors are pin-pointed and direct navigation is provided to the underlying data for the required fix.

"No news is good news when your Finance department is involved," added Davy. "Finance can track supplier payment status directly in the tool, and we know when the invoice was submitted and paid. There is no more having to call AP departments to check on payment status!"

The ELEVATE platform provides staffing suppliers with practical features and intuitive functionality throughout the process. This ultimately enables organizations to focus less on administration, and more on sourcing the best talent to drive business success. For more information, visit us at www.elevatesaas.com.
