ELEVATE Innovations

ELEVATE enables customer hiring managers to open job requisitions and push those reqs to your applicant tracking system (ATS). Account executives and recruiters are able to source for those reqs and submit candidates in the ATS which then get pushed back to ELEVATE for client review and disposition. Agencies can also engage with tier-2 suppliers to source for those reqs and manage submittals and client review in ELEVATE. Clients can extend offers for candidates in ELEVATE which get pushed back to the ATS to manage with your candidate. The full onboarding process is also coordinated between ELEVATE and your ATS.

Once a resource is onboarded, ELEVATE provides a time and expense module which can drive an integrated and consolidated invoicing process. Finally, the platform enables a full supplier management capability for your tier 2 supply base.

Furthermore, you can enhance your sourcing effectiveness with an integration to ELEVATE Mobile Direct, the mobile talent pool engagement platform. With ELEVATE Mobile Direct, staffing firms plug into and/or build their own talent pools of highly qualified, pre-vetted resources. Firms gain access to the platform's powerful Talent Pool Management Platform to accelerate the sourcing and engagement of resources for their short-term project needs.

Value Delivered
